Dear \_\_\_\_\_,

Re: Commuter Bicycle Counts Report

Bike to the Future recently completed our annual spring counts of commuter cyclists in Winnipeg, and I am enclosing a copy of the report for your information. As you will see from the report, commuter cycling appears to be up by 47% this year over last year, and up 64% since 2007. In addition, the report shows that cycling has increased more where there is infrastructure to encourage cycling than in other locations. The report also contains information on helmet use, sidewalk riding, how weather affects cycling, and counts and trends for specific locations in Winnipeg.

We feel that the increase reflects the cumulative effects of new infrastructure and the many efforts that have been made by many individuals and organizations to promote cycling as a means of transportation in Winnipeg. We appreciate your ongoing support in helping to make Winnipeg a bicycle-friendly city. It is clear that we are making progress.

We hope you will find this information useful. Feel free to contact me with any questions or comments you may have.

Sincerely,

Jeremy Hull

on behalf of Bike to the Future Board of Directors
